

**INTERNATIONAL WORKSHOP:  
MANAGEMENT OF LATE PRESENTERS WITH CONGENITAL HEART DISEASE**

23<sup>rd</sup> of November, Elite Ideon Hotel, Lund, Sweden

8.25-8.30 Welcome and introduction (P Liuba)

**8.30-9.35 SESSION 1: GENERAL CONSIDERATIONS**

*(Moderators: F Berger, J Johansson Ramgren, U Thilén)*

8.30-8.38 What is late..? Reasons for late diagnosis of CHD (T Krasemann)

8.43-8.51 Facts and trends at Skåne University Hospital (K Hanseus)

8.56-9.04 Planning for inpatient visit- my wish list (K Tilesch)

9.09-9.17 Cardiac assessment- what to focus on? (M Bhat)

9.22-9.30 Planning anesthesia prior to invasive diagnosis and interventions (J Gelberg)

**9.35-10.05 SESSION 2: LESSONS FROM EASTERN EUROPE**

*(Moderators: S Qureshi, M Synnergren)*

9.35-9.45 Treatment of children with CHD from Bosnia-Herzegovina and Kosovo in Lund 1995-2007 (NR Lundström)

9.50-10.00 Late presenters with CHD in Romania – what have we learned? (H Suci)

*10.05-10.20 Coffee break*

**10.20-12.30 SESSION 3: LATE DIAGNOSED SHUNT LESIONS WITH PHT**

**10.20-11.15 I. General considerations and ASD**

*(Moderators: N Haas, T Krasemann, K Tran Lundmark)*

10.20-10.28 PHT in shunt lesions: how late is too late? (R Berger)

10.33-10.41 Goals and pitfalls in hemodynamic assessment (H Wähländer)

10.46-10.54 Novel intraoperative 3D imaging to improve understanding of the anatomy of septal defects (K Tran)

10.59-11.07 ASD - when to close and which device should we use? (S Qureshi)

**11.15-12.35: II. VSD and PDA**

*(Moderators: R Berger, S Qureshi, K Tran)*

11.15-11.36 Surgical versus transcatheter VSD closure:

11.15-11.23 Surgical (J Johansson Ramgren, K Tran)

11.23-11.31 Transcatheter (TP Lê)

11.36-11.41 Device closure of surgically fenestrated VSD patch (N Haas)

11.41-11.46 Giant PDA in adult patient – can I close it with device? (N Haas)

11.51-11.59 PDA with right-to-left shunt-still closable? (TBA)

12.04-12.12 How to manage patients with PHT after shunt closure? (R Berger)

12.17-12.25 Creation of Pott's shunt in patients with Eisenmenger physiology (F Berger)

*12.30-13.30: Lunch*

**13.30: 14.45 SESSION 4: LATE DIAGNOSED OBSTRUCTIVE CHD**

*(Moderators: F Berger, M Synnergren, C Weismann)*

13.30-13.38 Pulmonary stenosis with suprasystemic pressure (TBA)

13.43-14.14 Supravalvular aortic stenosis:

- 13.43-13.51 Pre-operative assessment (A Hallbergson)  
13.51-13.59 Surgery and post-operative care (J Johansson Ramgren)  
14.14-14.22 Complex aortic coarctation and midaortic syndrome (S Qureshi)

*14.30-14.45 Coffee break*

**14.45-16.00 SESSION 5: LATE DIAGNOSED CYANOTIC CHD**

*(Moderators: N Haas, K Hanseus, H Suciu)*

- 14.45-14.53 How to manage these patients prior to intervention (U Thilén)  
14.58-15.06 PVR assessment using MRI catheterization (K Pushparajah)  
15.11-15.19 Surgery of common arterial trunk and of TGA beyond infancy (M Bhat, J Johansson Ramgren)  
15.24-15.32 Pulmonary artery banding in patient with DORV, AVSD and heterotaxy (H Lidén, M Synnergren)  
15.37-15.45 Thoughts about a mechanically adjustable pulmonary band (TP Lê)  
15.50-15.58 Transcatheter options (F Berger)

*16.05-16.20 Coffee break*

**16.20-17.00 SESSION 6: LATE DIAGNOSED CHD WITH FAILING CIRCULATION**

*(Moderators: F Berger, TP Lê, M Stagmo)*

- 16.20-16.28 Transcatheter volume unload using atrial flow regulator (N Haas)  
16.33-16.41 Novel flow reducer in Fontan circulation with significant AVM (P Liuba)  
16.46-16.54 Surgical options (J Nilsson)

**17.00-18.00 SESSION 7: NIGHTMARE CASES**

*(Moderators: S Qureshi, J Johansson Ramgren, P Liuba)*

2 surgical and 2 transcatheter cases: 5 min talk + 10 min discussion/case

18.00 Wrap-up
